

Join us to provide a new wave of enrichment

Join the S.E.A. team as they explore local oceans, rivers and lakes in a live 30min show, direct to you and your clients

We have a fantastic product which:

- Calms viewers in Aged Care facilities
- Creates a relaxing atmosphere for residents and staff after participating in a live dive
- Provides a topic of conversation between our audience and their family / carers
- Allows engaging outside interaction without leaving the facility

S.E.A. connects live to tablets, laptops or other means, and can be shared into Common Rooms and individual living areas.

Initial feedback indicates repeated audience enthusiasm, lower staff stress, and building of a bridge between residents and staff.

“live underwater experiences create a different kind of source of entertainment dominating in positive mood and interactions between residents for all groups.”
